

SPOT LIGHT

"mushrooming" of the composite material. It's protected with Sure Drive USA's exclusive four-step coating process for exceptional corrosion resistance. Learn more at www.suredrive.com.

MURO EJECTOR SCREWS

Many contractors still believe that fastening Brazilian hardwoods, like Ipe and Green Heart, without pre-drilling is simply not possible. The fact is that Muro's

patented Ejector Screws have been completing these decking jobs for years, although this has been a closely held secret. Contractors in the know won't typically divulge their secret because they would lose a huge competitive advantage. Muro Auto Feed Systems and fasteners provide

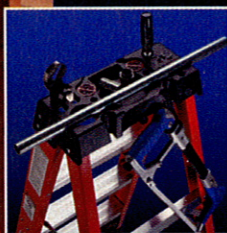

THE BEST JUST GOT BETTER

The NXT1A series, trusted by professionals for its durability, is now loaded with new, advanced features to maximize your productivity.

HolsterTop[®] PRO

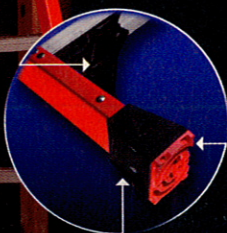

Holds an arsenal of tools

the complete system to handle projects large and small. Ejector screws come in a variety of sizes, including all the way to 4 inches long. The screws come in collated belts for use with the Muro Speed Driver, an upright auto-feed screwdriver that provides tremendous labor savings and allows installers to work ergonomically by standing upright. RSS RUGGED STRUCTURAL SCREW

For heavy-duty framing, the GRK's RSS Rugged Structural Screw is made of specially hardened steel to serve as a self-tapping lag screw alternative. It eliminates the need for a pilot hole as well as the need for washers. With its high-torque design, high-tensile strength and narrow shaft, the RSS quickly bores through wood, greatly reducing the risk of splitting the material, and grips tightly with superior holding strength. RSS screws that are 3-1/8-in. and longer
